

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-5 (Canceled).

Claim 6 (Previously Presented): An image pick-up device or an image capturing device for generating image data that is related to an image processing control parameter designating an image processing condition for image data, said image pick-up device or said image capturing device comprising:

means for generating said image data;

means for designating an imaging condition when said means for generating generates said image data;

means for storing a plurality of combinations, each combination composed of said imaging condition and a plurality of said image processing control parameters;

means for acquiring from said means for storing said plurality of image processing control parameters for said designated imaging condition; and

means for relating said generated image data to said plurality of acquired image processing control parameters, and outputting the related image data.

Claim 7 (Previously Presented): An image pick-up device or an image capturing device according to claim 6, further comprising:

means for modifying a value of any image processing control parameter among said plurality of acquired image processing control parameters.

Claim 8 (Previously Presented): An image pick-up device or an image capturing device according to claim 6, wherein said image processing condition is a condition for an output device that will output said image data.

Claim 9 (Previously Presented): An image pick-up device or an image capturing device according to claim 6, wherein said image processing control parameters include at least parameters relating to color space, gamma correction value, contrast, brightness, color balance, saturation, sharpness, color cast, and noise elimination.

Claim 10 (Previously Presented): An image pick-up device or an image capturing device according to claim 6, wherein said image pick-up device or said image capturing device is a photographic device; and said imaging condition is a picture mode in said photographic device.

Claims 11-31 (Canceled).

Claim 32 (Previously Presented): An image pick-up device or an image capturing device for generating image data that is related to image processing control information designating an image processing condition for image data, said image pick-up device or said image capturing device comprising:

- means for generating said image data;
- means for designating an imaging condition when said means for generating generates said image data;
- means for storing a plurality of sets of said image processing control information, the information specifying an image processing control parameter set to be used for image processing of said image data, under said imaging condition;
- means for acquiring from said means for storing said image processing control information for said designated imaging condition; and
- means for relating said generated image data to said acquired image processing control information, and outputting the related image data.

Claim 33 (Previously Presented): An image pick-up device or an image capturing device according to claim 32, wherein said image processing condition is a condition for an output device that will output said image data.

Claim 34 (Previously Presented): An image pick-up device or an image capturing device according to claim 32, wherein said image processing control parameters include at least parameters relating to color space, gamma correction value, contrast, brightness, color balance, saturation, sharpness, color cast, and noise elimination.

Claim 35 (Previously Presented): An image pick-up device or an image capturing device according to claim 32, wherein said image pick-up device or said image capturing device is a photographic device; and said imaging condition is a picture mode in said photographic device.

Claims 36-61 (Canceled).
